the concept

THE REFINED EDGE

our strategy bridges the gap between high-end luxury and the brand's rebellious "parachute" dna.

we place sophisticated silhouettes in raw, minimalist environments to create a unique visual voice.

01

TRANSFORMING THE DIGITAL EXPERIENCE.

our visual dna is built on the **contrast** between warm desert neutrals and bold obsidian black. every visual must breathe **luxury** through **minimalism**

avoid pure white backgrounds in lifestyle photos; always aim for warm, textured surfaces (plaster, linen, sand)

RULES: 70% neutrals / 20% black / 10% gold.

02

photography style

AUTHENTIC REALISM

we move away from 'plastic' studio looks. we embrace imperfections that feel **real** and **expensive**

lighting: natural side-lighting or harsh direct flash (editorial style)

details: gold statement accessories, other luxury items, sunglasses, and etc.

skin: raw texture, visible pores, no heavy retouching

attitude: confident, "rebel luxury" poses

03

THE SIGNATURE FABRIC

the 'parachute' is our iconic element. we use **voluminous** drapes to create architectural **depth**

- use heavy silk or linen fabrics in cream/beige/black
- create messy, organic folds
- the background should feel like a high-end art installation, not just a curtain

04

product page presentation

EDITORIAL CATALOG STYLE

moving away from 'plastic' studio shots. we focus on natural light, authentic fabric textures, and sophisticated silhouettes to create an expensive **boutique experience**.
